

Environmental Policy

MATHESON is committed to the protection of the environment and continual improvement of our environmental performance. We meet or exceed the requirements of all applicable environmental regulations and, in the absence of regulations, implement environmentally sound practices. MATHESON has established measurable environmental objectives and reviews their progress periodically. We are dedicated to maintaining transparency of our goals and results to provide effective interaction and communication with suppliers and customers.

MATHESON provides products and services that are produced in an environmentally sensitive manner. We support pollution prevention efforts to minimize energy consumption, materials usage, and waste generation related to our business activities. Our workforce is trained to operate efficiently and to recognize our environmental impact within our business operations.

MATHESON utilizes reviews and audits to confirm that the Company's environmental policies are being implemented. These results are used to strengthen our Environmental Management System and our commitment to continual improvement and environmental stewardship.
